LOS ANGELES COUNTY HOUSING TRENDS

NET CHANGE COMPARED

Year	Housing Units* Single**	Multiple	Total	Change From Year Ago (Total Units)
1971	1,305	28,707	30,012	2,314
July-December	1,911	17,471	19,382	6,034
January-June	- 606	11,236	10,630	-3,720
1970	2,871	24,827	27,698	4,649
July-December	82	13,266	13,348	1,660
January-June	2,789	11,561	14,350	2,989

*These figures are compiled from a survey of residential new construction, move-ins, removals, demolitions and alterations reported by each of the permit issuing agencies in Los Angeles County. Housing unit changes are entered in the housing inventory either upon completion or after an assumed completion date.

**Includes duplex units.

HOUSING INVENTORY SHOWS MODERATE INCREASE IN 1971

Net additions to the housing inventory during 1971 totaled 30,012 or 2,314 units more than were added in 1970. This is an increase of 8.4% over the previous year and marks the fourth year that the annual total of net units added has exceeded that of the preceeding year.

These net additions raised the County's estimated housing inventory to a January 1, 1972 total of 2,592,031 housing units. This new total represents an approximate two percent increase or the addition of 50,399 housing units to the 2,541,632 total housing units counted in the 1970 Census.

Ninety-six percent of the 1971 housing increase resulted from net additions to multiple housing inventory. Although net additions of single housing units rebounded strongly in the second half of the year with 1,911 units beind added, the net loss of 606 units in the preceeding six months reduced the net single additions for the year to 1,305 units. This is the lowest number of net annual single housing unit additions since the close of World War II.

Sixty percent of the net new housing units added were located in five of the thirty-five major statistical areas. These areas and their net unit increases were as follows: (MSA 22.0) Norwalk Area 3,102, (MSA 30.0) Santa Monica-Venice Area 2,389, (MSA 13.0) Encino-Central Valley Area 1,972, (MSA 6.0) Chatsworth-West Valley Area 1,705, (MSA 31.0) South Bay Area 1,420 and (MSA 10.0) Dominguez-Los Angeles Harbor Area 1,056 units.

Large scale additions of multiple units were particularly noted in such localities as the Marina del Rey, Redondo Beach, Chatsworth, Van Nuys, Sherman Oaks, Culver City, Harbor City and Downey.

Unlike the almost endemic character throughout the County of multiple housing construction, seventy percent of the single housing units added last year were located in Cerritos. The 1,337 single units constructed in this former major dairy center in southeastern Los Angeles County far outdistanced the number of single units added to such dispersed localities as Lancaster 247 units, West Covina 235 units and Carson 233 units.

LOS ANGELES COUNTY POPULATION

January 1, 1972 Estimate 7,085,380

The population of Los Angeles County rose an estimated 9,339 during the second half of 1971. This increase together with an upward adjustment of 8,260 in the 1970 Census count brought the County's population to a January first total of 7,085,380.

On January 1, Los Angeles City reached a total population of 2,824,757. This new estimated total represents a gain of 14,790 since the 1970 Census. Other cities showing substantial post 1970 Census gains include the following: Cerritos, 7,067; Covina, 1,078; Culver City, 1,046; Long Beach, 2,129; Redondo Beach, 1,630; Santa Monica, 1,077; Torrance, 2,498; and West Covina, 1,677. Four additional cities also had large increases, but much of their gain was the result of inhabited annexations. These cities and their respective April 1970 to January 1972 increases are as follows: Carson, 1,884; Gardena, 5,332; Long Beach, 2,129; La Mirada, 846 and South El Monte, 2,901.

The population in the unincorporated areas on January 1, totaled 1,027,911. This new figure represents a loss of 6,068 persons since the 1970 Census. Most of this loss was the consequence of large inhabited annexations.

For Additional Information: *Call or write the Population Research Section, Los Angeles County Regional Planning Commission, 320 West Temple St., Los Angeles 90012, MAdison 8-9211, Extension 63032.*

THE REGIONAL PLANNING COMMISSION OF LOS ANGELES COUNTY. *Commissioners: Arthur J. Baum, Chairman; Owen H. Lewis, Vice Chairman; Mrs. L. S. Baca, Howard D. Martin, Alfred E. Paonessa. Director: Orville K. Christenson.*

STATISTICAL AREAS REVISED

Reader interest in particular localities, user suggestions and a Commission desire that Statistical areas should be relevant to these changing needs prompted the initiation of an intensive review of the existing Statistical Areas Plan. The map and table in this issue reflect the results of this review.

The integrity of the boundaries of census tracts, cities and Major Statistical Areas were preserved in all but two instances in creating the 47 new Statistical Areas which have been added to the map and table. Almost all of the new Statistical Areas were devised by dividing existing large areas into smaller reporting units. The following seventeen Statistical Areas were divided: 1.15, 4.2, 5.11, 6.1, 10.11, 13.1, 20.11, 20.12, 20.13, 26.12, 26.13, 26.14, 27.2, 29.1, 30.23, 32.72 and 34.24.

In numbering new Statistical Areas, the previous Statistical Area designation has been retained and a numerical suffix added. Thus, former SA 1.15 now will be reported in two parts as SA 1.151 and SA 1.152.

It was necessary in two instances to split a census tract and in one to transfer a census tract from one Statistical Area to another.

The establishment of separate reporting areas for Hacienda Heights and Rowland Heights occasioned the division of census tract 4086.02 along the proposed alignment of Azusa Avenue with the major portion assigned to SA 26.122 and the small eastern segment placed in SA 26.141. Census tract 4082.01 was transferred from SA 26.12 to SA 26.141.

In order to improve reporting in the greater Newhall areas, census tract 9108 was split along 1970 Census enumeration district boundaries with the smaller western portion designated SA 20.124 and the larger eastern segment SA 20.123.

POPULATION AND HOUSING TABLE NOTES

Annexations involving a significant number of housing units during the last half of 1971 included the following:

a. 336 housing units were shifted from SA 12.22 to SA 12.3 (South El Monte City), b. 67 units were annexed by SA 7.4 (Glendora City) from SA 7.512, c. 52 units were taken from SA 7.521 and added to SA 7.3 (West Covina City), d. SA 28.3 (San Gabriel City) took 34 units from SA 28.64, and e. 20 units were added to SA 7.2 (Covina City) from SA 7.522.

Corrections in the 1970 Census counts shown in the October issue were entered in the 1970 columns and in many instances are reflected in the 1972 figures.

Sources: 1970 Census, Fourth Count Summary Tapes; 1960 and 1950 Censuses.

MEXICAN AMERICANS INCREASE OTHER WHITES DECLINE

The Spanish American population of Los Angeles County more than doubled during the last decade, while the other white population (Non-Spanish American whites) declined by almost 100,000 persons. Those two salient facts were disclosed when the United States Bureau of the Census recently released the 1970 Spanish American counts for California.

The County's Spanish American white population on April 1, 1970 totaled 1,228,595. This represented a gain of 651,879 during the Sixties or an increase of 113%. Spanish American whites now account for approximately 17.5% of the total population of the County. Mexican Americans who comprise the vast majority of these Spanish Americans continue to be the County's largest minority and in fact constitute a larger population than all the other minorities combined.

The identification and establishment of the number of Mexican Americans in the 1970 population of Los Angeles County continues to be a somewhat confusing problem. This is partly the result of a change in the definition of Spanish heritage population used by the Bureau of the Census in 1970 and secondly a changing relationship in the population of Mexican Americans to a growing number of those of Cuban, Puerto Rican or other Latin American descent.

The definition of Spanish American used in the 1970 Census included all persons regardless of race who reported that Spanish was spoken in their childhood homes and/or those with Spanish surnames. However, in the 1950 and 1960 Censuses, the Spanish surname was used exclusively to determine the number of Mexican Americans. These persons were identified by counting all persons with Spanish surnames, then eliminating from the count those who were reported as non-white.

The 1,289,311 Spanish Americans reported in 1970 included 23,844 Negroes and 36,872 others. Most of the latter are persons of Asian descent. The remaining number of 1,228,595 Spanish American whites is a more comparable figure to the Spanish surname count reported in the two previous decennial censuses. However, within this count are 20,306 whites of Puerto Rican birth or parentage. The issue is further clouded in that no Puerto Rican count is available for 1960. Therefore in comparing 1960 and 1970 figures, it is difficult to judge whether or not they were a significant factor in the previous census.

THIRTY YEARS

This issue marks the thirtieth anniversary of the publication of the first Quarterly Bulletin. Begun during the early months of the involvement of the United States in World War II, the initial three issues were published concurrently in May, 1942.

Although publication was suspended for a brief period in the early Fifties, the Quarterly Bulletin is the oldest report of its kind in the western United States. It now reaches over 3,500 subscribers each quarter.

LOS ANGELES COUNTY POPULATION

Los Angeles County population at mid-year totaled 7,090,452. This new total represents an estimated increase of 5,072 during the first half of the year and the addition of nearly 50,000 residents since the 1970 Census.

Los Angeles City continued to lead all cities in aggregate growth since the decennial census. On July 1, Los Angeles reached a total population of 2,825,622. This is a gain of 15,809 residents in the past two and one-quarter years. Cerritos, a city once known as Dairy Valley, closely followed with a population gain of 14,587 during the same period to reach a mid-year total of 30,443.

Ranking behind Cerritos in post 1970 Census growth were Gardena 5,214, Torrance 2,822, South El Monte 2,734, Long Beach 2,424, Carson 2,054, West Covina 1,997, Redondo Beach 1,847, and Hawthorne 1,695. It should be noted that a substantial portion of Gardena's growth was the result of a major annexation.

The number of residents in the unincorporated area totaled 1,025,738 on July first. This decline of 7,772 since the 1970 Census is largely the consequence of annexations.

SINGLE UNITS MAKE STRONG SHOWING IN FIRST HALF

The net increase in single units during the first half of the year totaled 3,060 units. This is the largest increase in single units for any six month period since the first half of 1969 and 1,149 units or 32% greater than the single units increase registered in the last half of 1971. Although this represents a strong recovery in the construction of single units, it must be remembered that it follows the period of July 1970 through June 1971 during which this housing type experienced a net loss of 524 units.

Ninety percent or 69,983 of the 76,219 net housing units added to the inventory since January 1, 1970 have been in multiple structures. However, in the first six months of this year, the number of net multiple units added declined 11.6 percent or 2,022 as compared with those added during the previous six months.

THE QUESTION OF HOUSEHOLD SIZE

Much discussion in recent months has centered on the falling birth rate, family planning and birth expectations, dropping school enrollments, an aging population, and other conditions which have a significant portent for the future of the nation, state and, of course, Los Angeles County. What many do not realize is that the

TABLE I
LOS ANGELES COUNTY
AVERAGE HOUSEHOLD SIZE
(Persons per Occupied Unit)
1910 to 1970

Year	Occupied Dwelling/ Housing Units	Average Household Size	Percent Change from Previous Figure
1910	127,362a.	3.96	
1920	261,097a.	3.59	-9.4
1930	652,676a.	3.38	-5.6
1940	893,608	3.12	-7.9
1950	1,370,989	3.00	-3.6
1960	1,982,188	2.94	-2.1
1970	2,433,423	2.83	-3.7

a. No formal housing census was taken before 1940, therefore these counts had to be derived from earlier census definitions which approximate those currently in use. Although these figures must be considered estimates, it is believed that they are very close to what the actual numbers would have been had the present definitions existed in those years.

average household size, an important measure of these changing conditions has been declining in this County for more than half a century.

Recent research disclosed that in 1910 the average household consisted of 3.96 persons. Sixty years later, the 1970 Census found that the average household size had declined to 2.83 persons. This long term decline in persons per occupied housing unit is clearly outlined in Table I.

Between 1940 and 1970, the years for which detailed countywide records are available, similar declines are found in all but seven of the thirty-five Major Statistical Areas. A comparison of the 1970 and 1940 average household size in these seven atypical Major Statistical Areas shows the following: MSA 5.0, Calabasas 3.41 (2.58), MSA 6.0, Chatsworth-West Valley 3.47 (3.38), MSA 7.0 Citrus 3.49 (3.32), MSA 8.0 Compton 3.46 (3.42), MSA 26.0 Puente Hills 4.20 (3.68), MSA 27.0 San Fernando 3.73 (3.58) and MSA 34.0 Whittier 3.44 (3.28).

Even among these, only the Calabasas and Puente Hills Areas experienced substantial increases in household size.

In 1970, these seven largely suburban Major Statistical Areas plus the urban MSA 11.0 East Area, a predominantly Mexican-American section, were the only Areas with an average household size of 3.4 persons or more. Only MSA 26.0 Puente Hills had an average of more than four persons per occupied dwelling unit.

Seven Major Statistical Areas in the last census had an average household size of less than 2.5 persons. These were the MSA 9.0 Central with 1.86, MSA 15.0 Hollywood 1.88, MSA 35.0 Wilshire 1.97, MSA 3.0 Beverly Hills 2.23, MSA 30.0 Santa Monica-Venice 2.33, MSA 2.0 Avalon 2.48, and MSA 14.0 Glendale 2.49.

Households as used in this context includes all families and unrelated individuals living in housing units. It does not include persons living in such group quarters as military installations, jails, convents, long term hospitals and other similar facilities.

POPULATION AND HOUSING TABLE NOTES

No major annexations occurred during the first half of the year. However, corrections in the 1970 Census counts were received from the Bureau of the Census. These corrections are shown in 1970 Census columns. They involved either the population or housing counts or both for the following Statistical Areas: 11.0, 11.22, 18.0, 18.3, 18.41, 18.5, 18.7, 19.11, 19.12, 20.0, 20.112, 20.113, 22.0, 22.3, 25.0, 25.2, 25.42, 28.0, 28.64, 30.231, 30.32 32.0, and 32.9. The sum of these changes increased the County's 1970 Census population by 335 and reduced the total housing count by 188 units.

THE REGIONAL PLANNING COMMISSION • COUNTY OF LOS ANGELES, CALIFORNIA

NATIVE POPULATION
Los Angeles County
1960 - 1970[1]

	1970	1960	1960-1970 Change Number	Percent
Los Angeles County	7,036,457	6,042,431	994,026	16.5
United States Natives[2]	6,244,500	5,466,051	778,449	14.2
Native Californians	2,782,544	2,084,485	698,059	33.5
Natives of Other States	3,125,843	3,156,998	-31,155	-1.0
State of Birth not reported	336,113	224,568	111,545	49.7
Non-native Population	791,957	576,380	215,577	37.4

Note: These data are derived from a sample and therefore do not necessarily match figures from the 100% count nor similar sample data derived from other Census questions.

LOS ANGELES COUNTY GOING NATIVE

Seventy percent of the approximately one million new residents added to the population of Los Angeles County during the Sixties were California born. A survey of the 1970 Census results revealed that the number of native Californians in the County in these years increased by slightly more than one-third to reach a 1970 total of 2,782,544. This group now comprises approximately 39.5% of the total population of the County as compared with 34.5% in 1960. In other terms, this means that the number of California born residents in the County in 1970 was almost equal to that of the population of Los Angeles City in that year.

An interesting sidelight to this increase is the strong probability that there would have been an even larger gain in native Californians, but for a sizeable out-migration from among their numbers. For example, County Health Department records show that there were approximately 1.3 million births and almost 600,000 deaths in the County during the Sixties. Assuming that deaths among native Californians during the decade totaled from 210,000 to 240,000 (35% to 40% of all deaths) and further assuming zero migration, this group in these years should have shown an increase of between 1,000,000 and 1,100,000. However, the 1970 Census found that their number increased by slightly less than 700,000 which leads to the conclusion that between 300,000 to 400,000 native Californians left the County in the decade.

However, Americans born in other states or places constituted the largest single element of the County's population. In 1970, they totaled 3,125,843 or 44% of the total population. This most recent count represents a decline of 31,155 since 1960, a year in which they numbered 3,156,998 and comprised 52% of the County's residents.

Reflecting the changing immigration patterns of the Sixties the number of the foreign born increased from 576,380 at the beginning of the decade to 791,957 at its close, an increase of 37 percent. They now account for 11% of all inhabitants.

The 1970 Census found that native Californians comprised 50 percent or more of the total native American population in 35 cities and unincorporated places in Los Angeles County. East Los Angeles ranked first, as in 1960, with 70.2% of its native American population reported born in California. The continued preeminence of this community is somewhat clouded by the fact that during the last decade the California born increased by only 751 and the number of Americans born in other states or places declined by 8,000.

The communities ranked in the top twenty by percentage of natives born in California almost exclusively contain large concentrations of Spanish Americans or a higher percentage than the County average. (See Quarterly Bulletin No. 116, April 1, 1972.) The exceptions to this observation are the cities of Cerritos and San Marino.

These top ranked communities share another feature. The great majority lie within the bounds of the San Bernardino and Santa Ana Freeways. Again, the concentrations of Spanish Americans in this area are conspicuous, indicating that "the barrio" effectively extends well beyond the confines of East Los Angeles.

At the opposite end of the scale and on the opposite side of the County, Beverly Hills with 32.7% native Californians, Santa Monica 32.0%, and West Hollywood 24.9%, point out the possibility that the entire Wilshire corridor may be low in its share of residents born in this State.

In looking at origins of the native populations in these westside communities, it is also found that this particular area may be a stronghold for migrants from the Northeast region of the United States. West Hollywood 29.6% and Beverly Hills 25.7% lead the County in percentage of native residents from the Northeastern states. Culver City and Ladera Heights which are to the south of these communities also include proportions of Northeasterners substantially higher than the County average.
